

About Shivani's paper

Samples in Solution

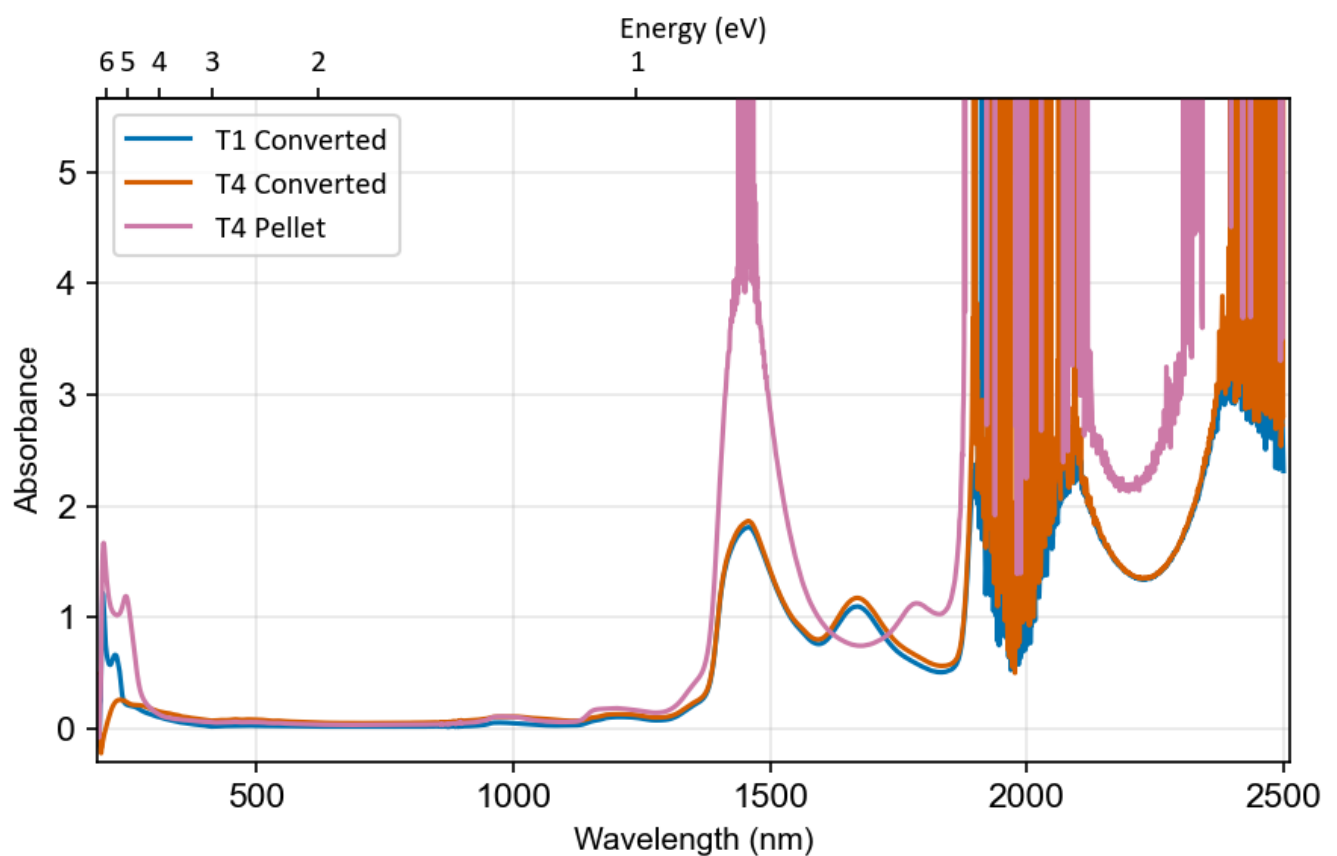

We received:

- sT1 converted dispersion
- sT4 converted dispersion
- sT4 converted dispersion - Pellet after PFO wrapping and DGU?

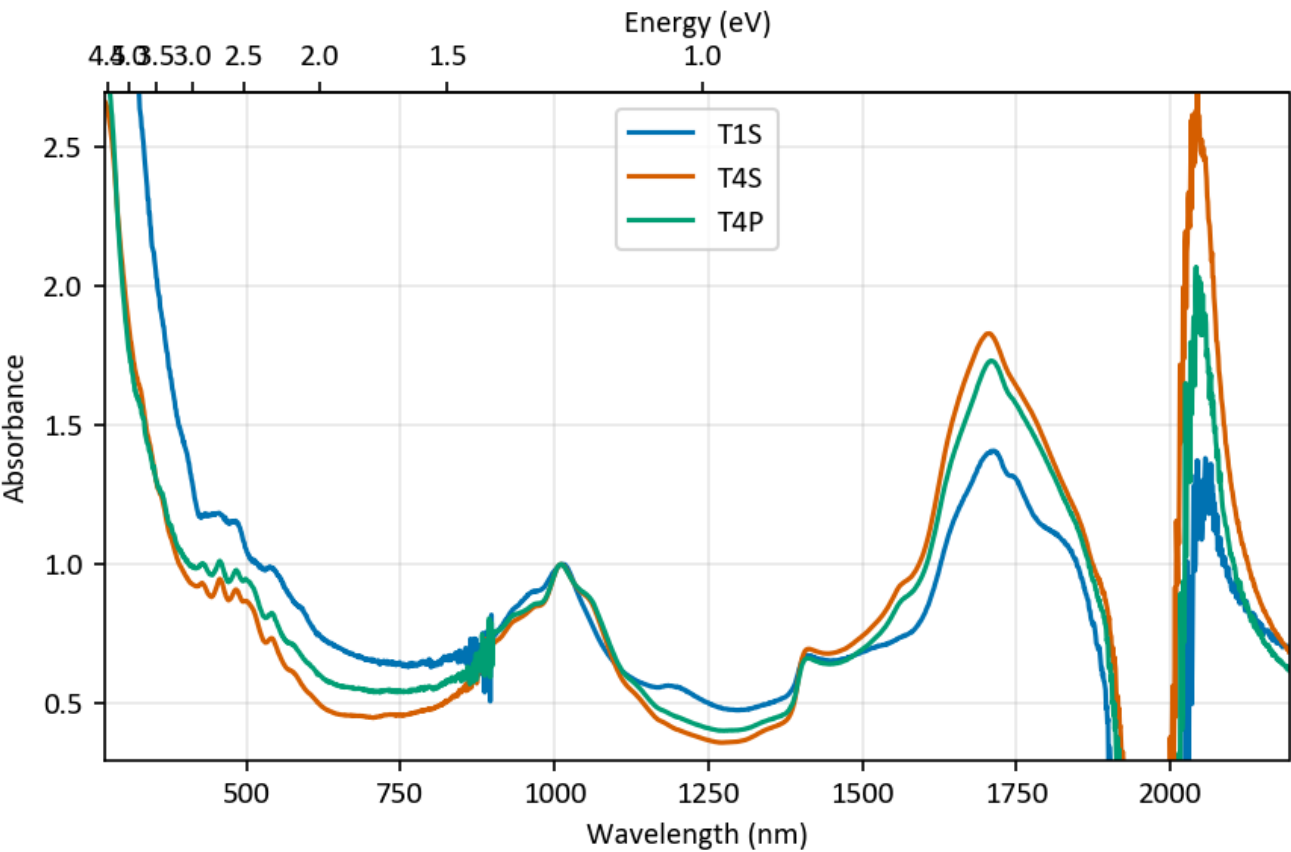

Absorption

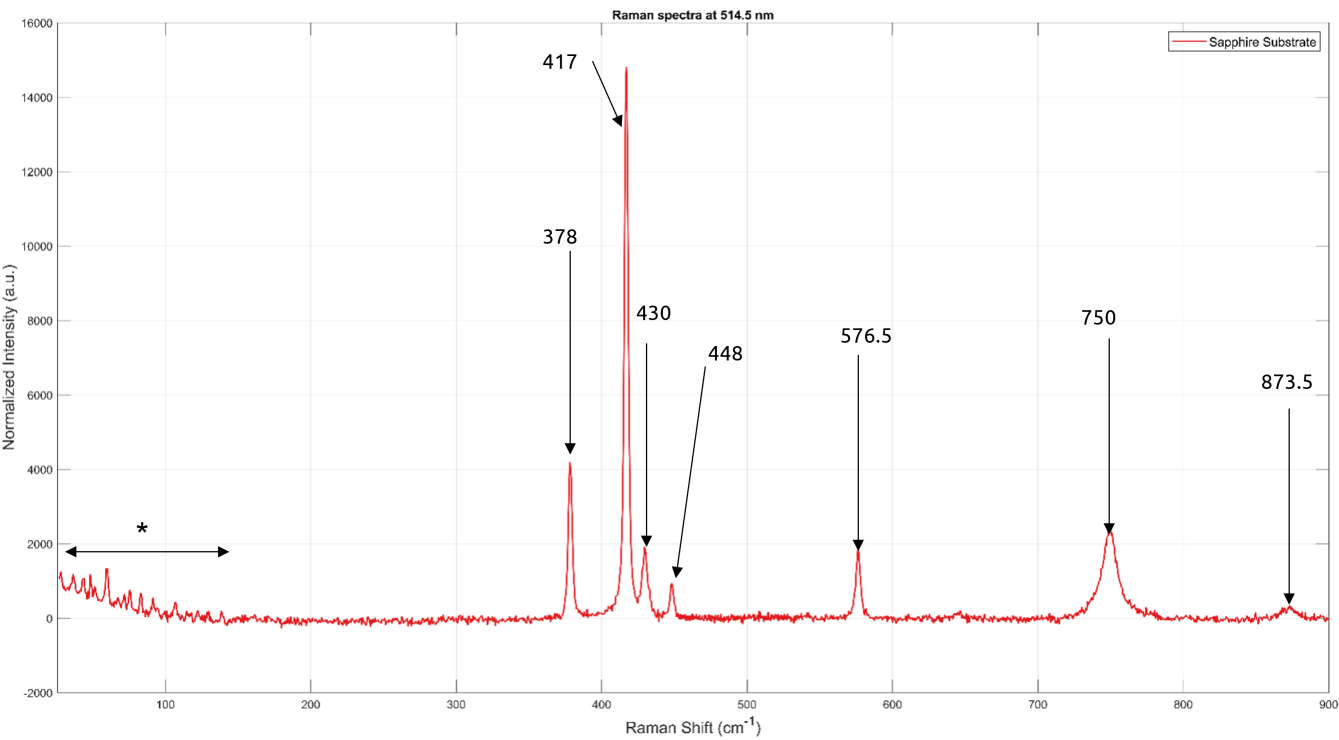

- Too much water content:

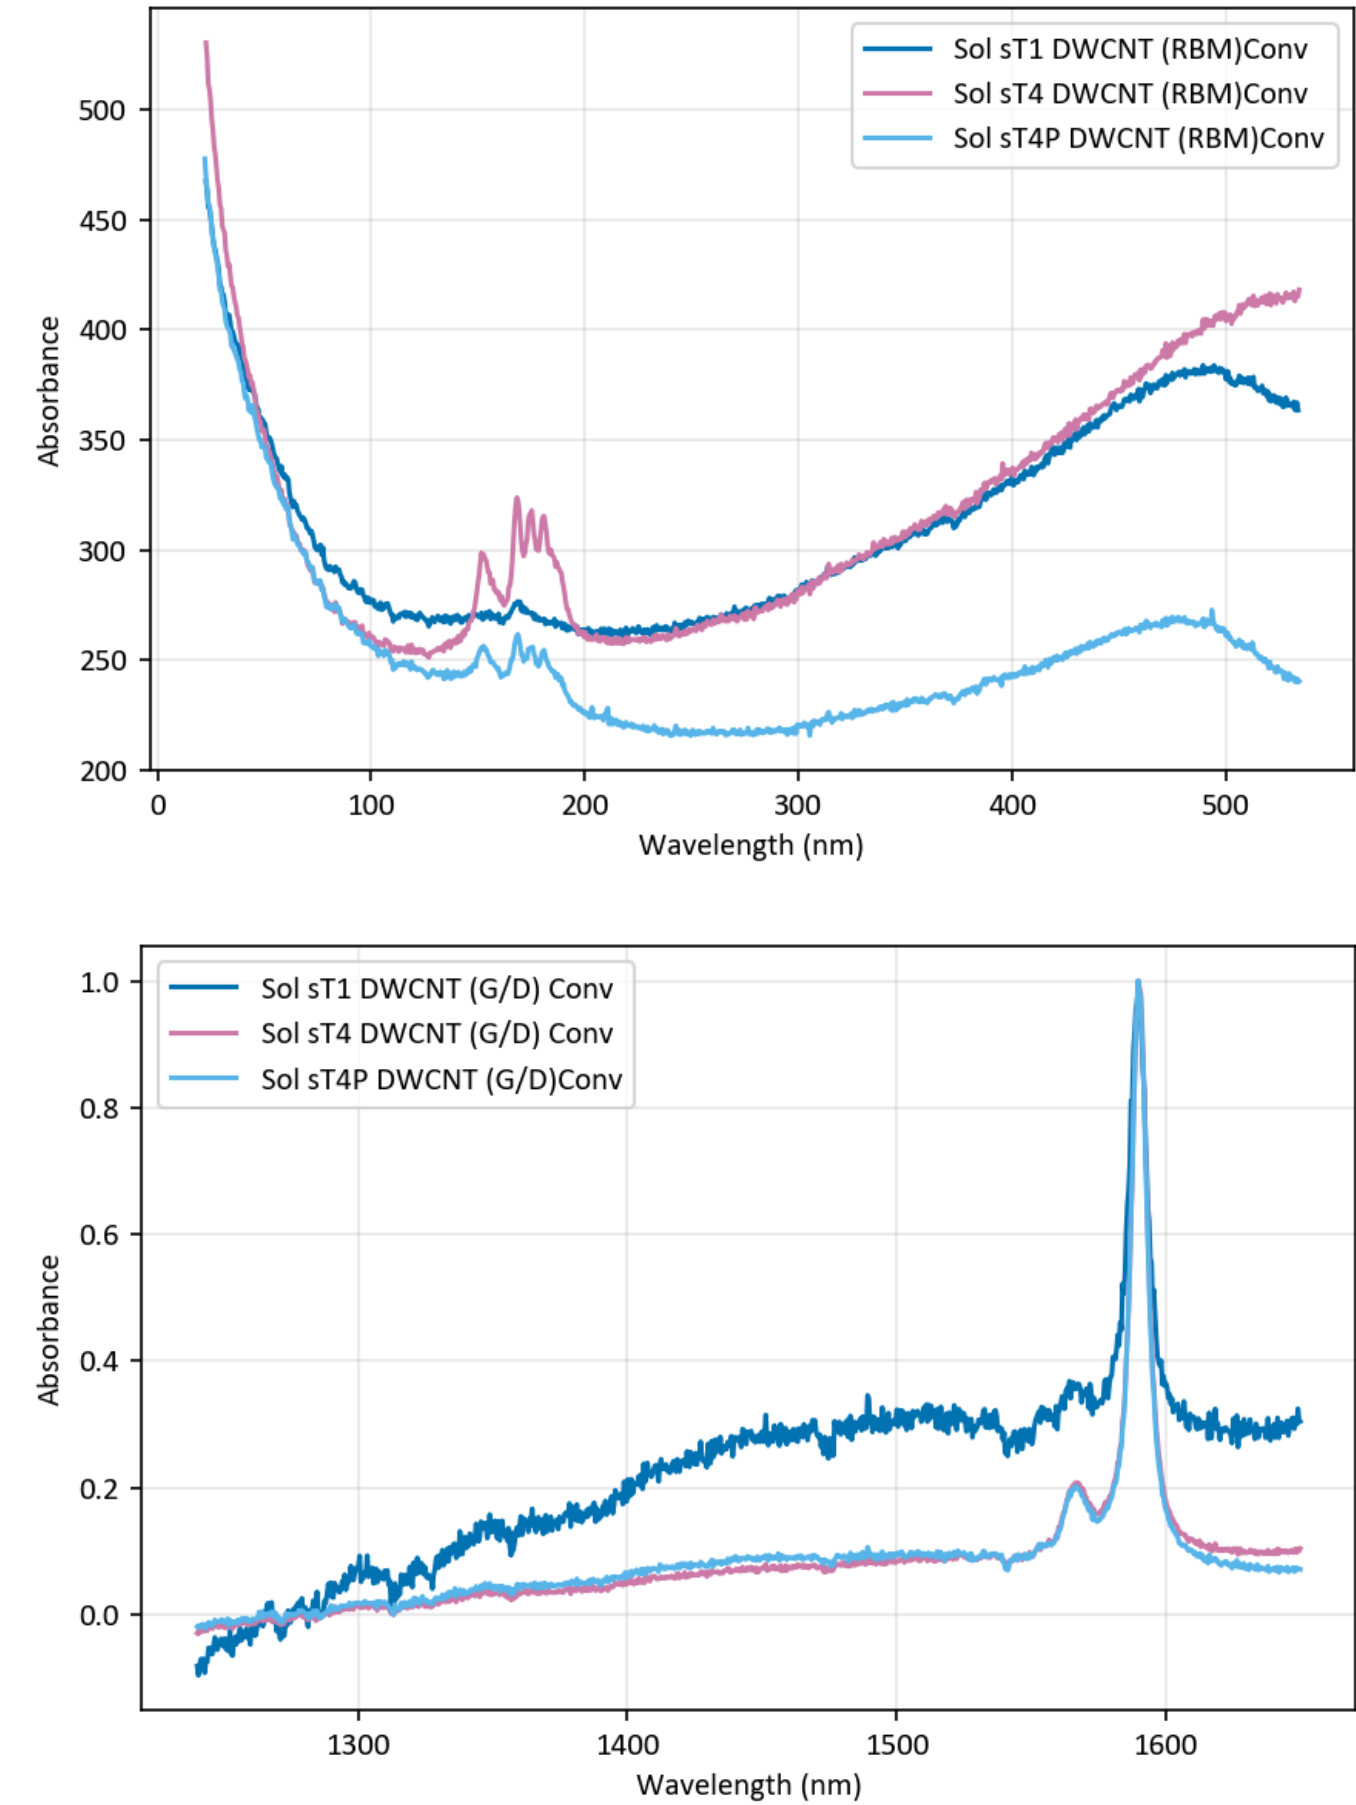

After this we did a dialysis to remove water content and re-measured absorption:

For reference here is the spectrum of the substrate:

Raman@514nm

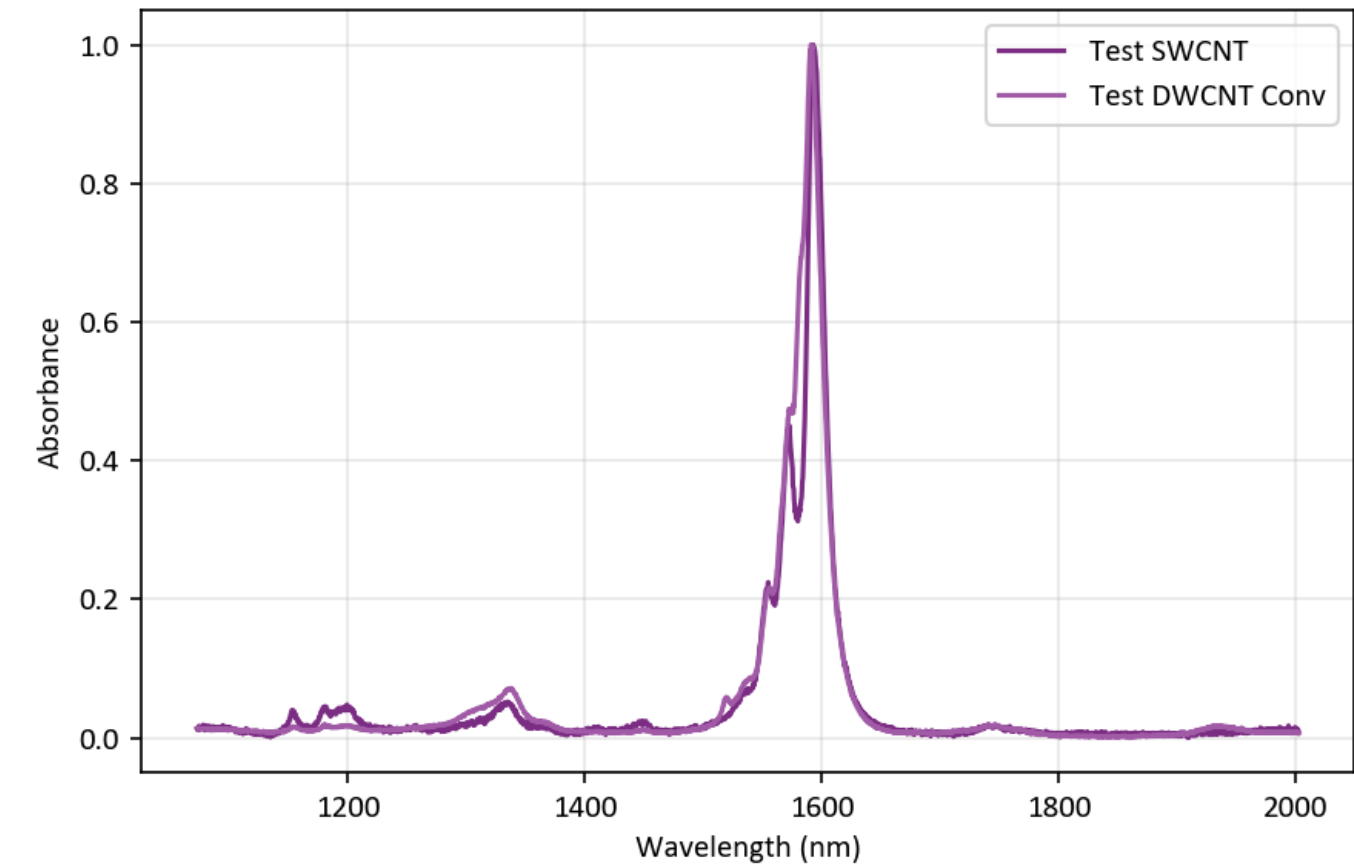

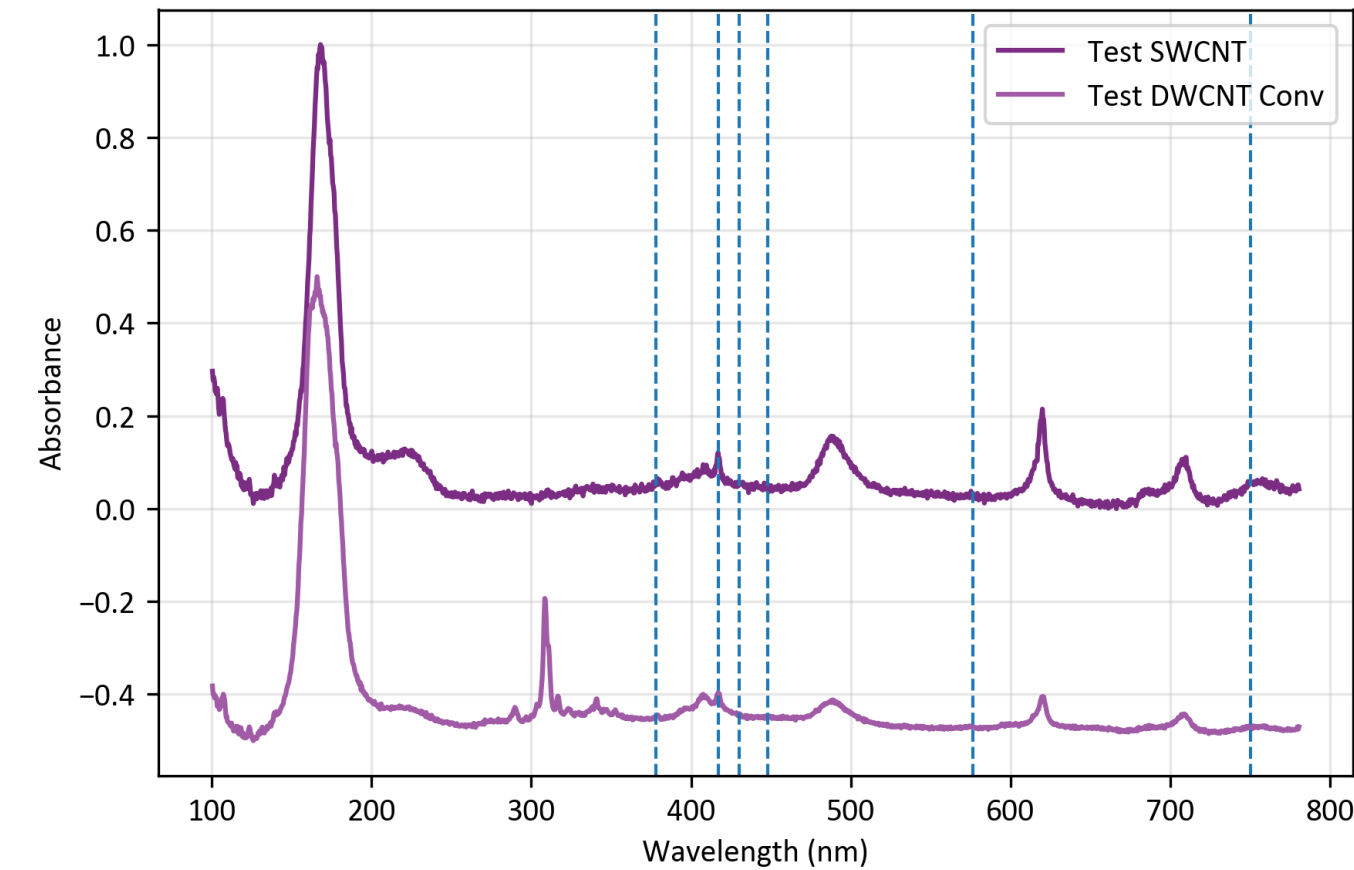

Films for testing

We received:

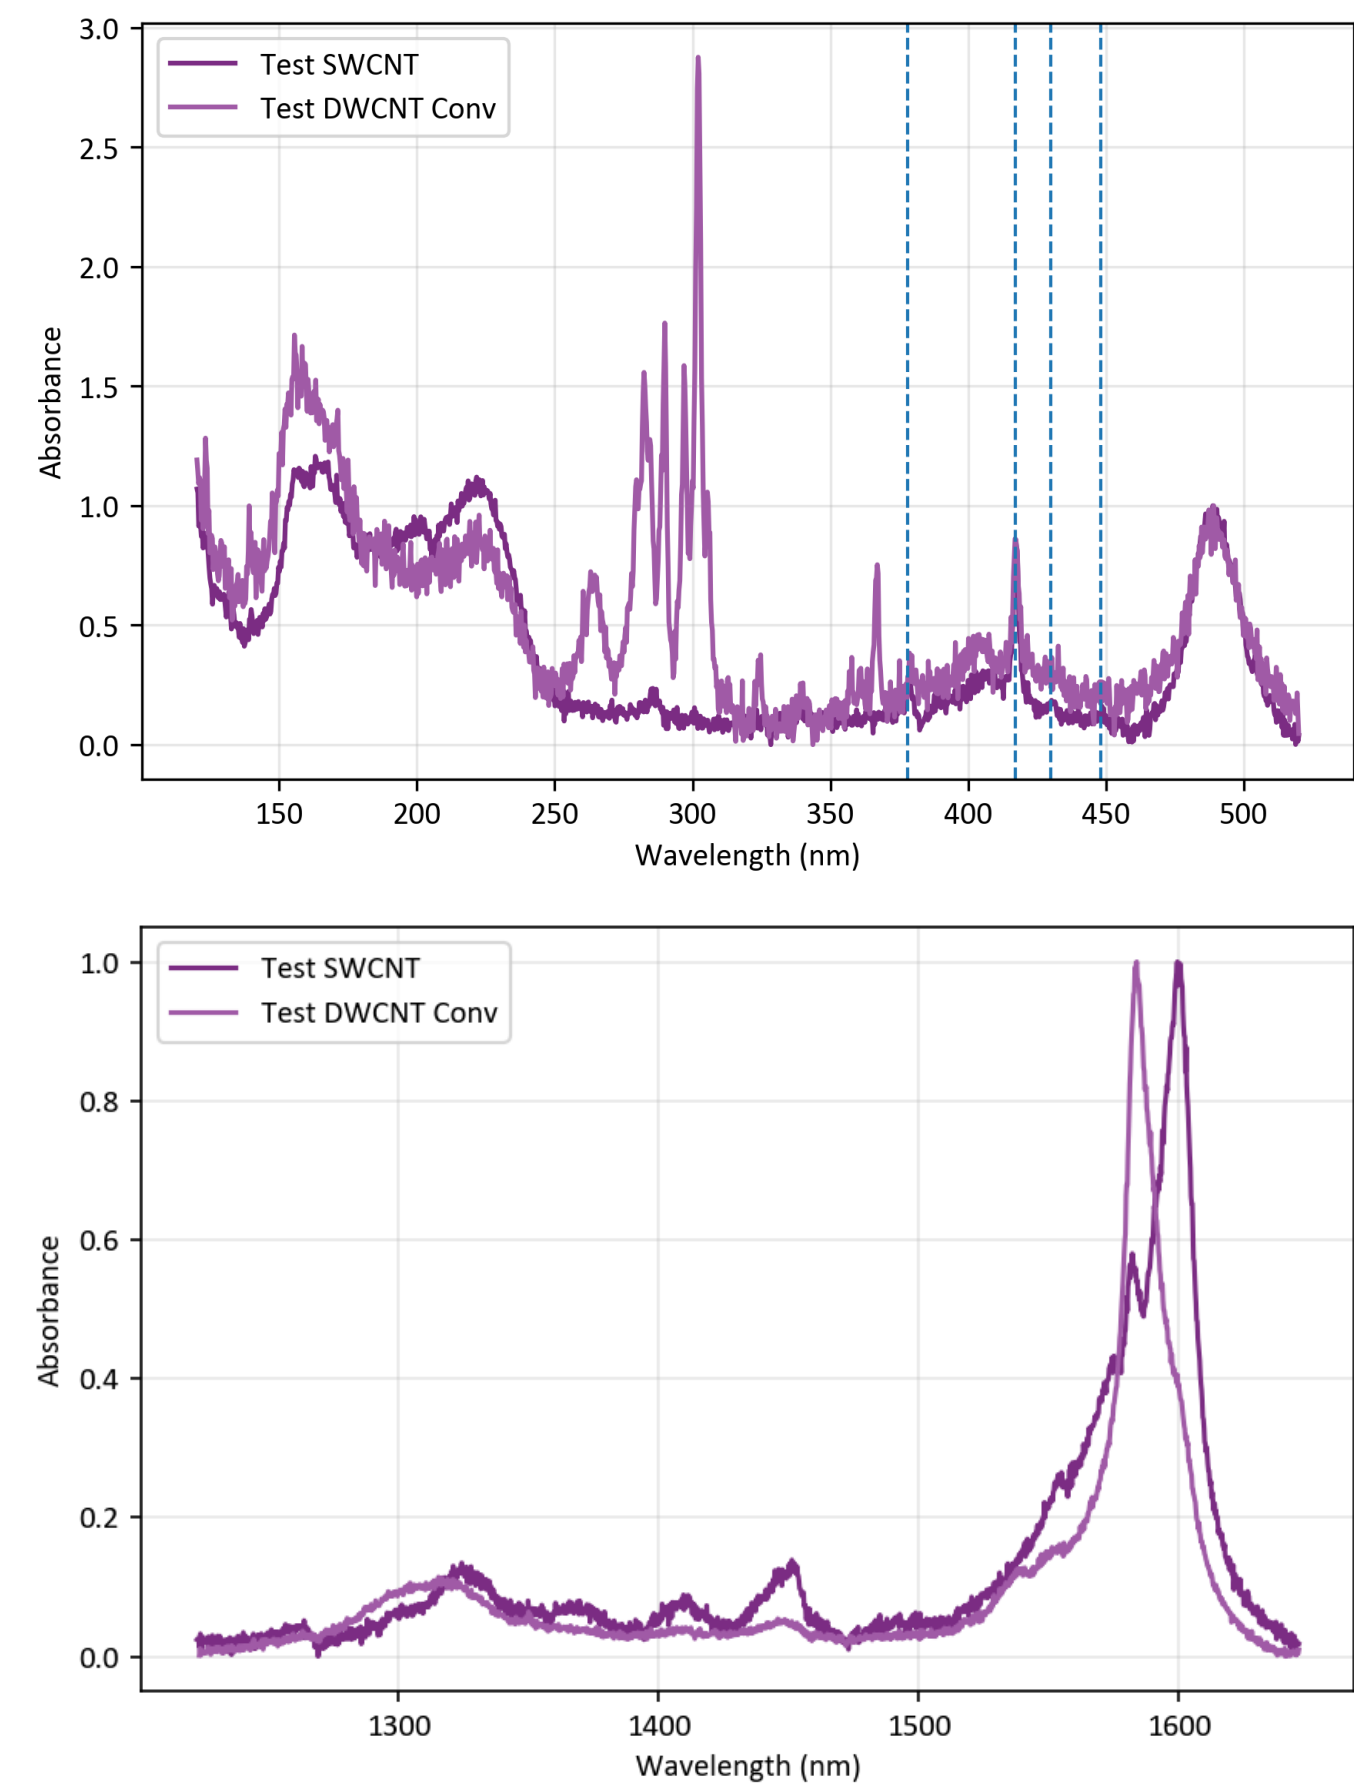

- film before conversion
- film after conversion

Raman@570nm

Raman@650nm

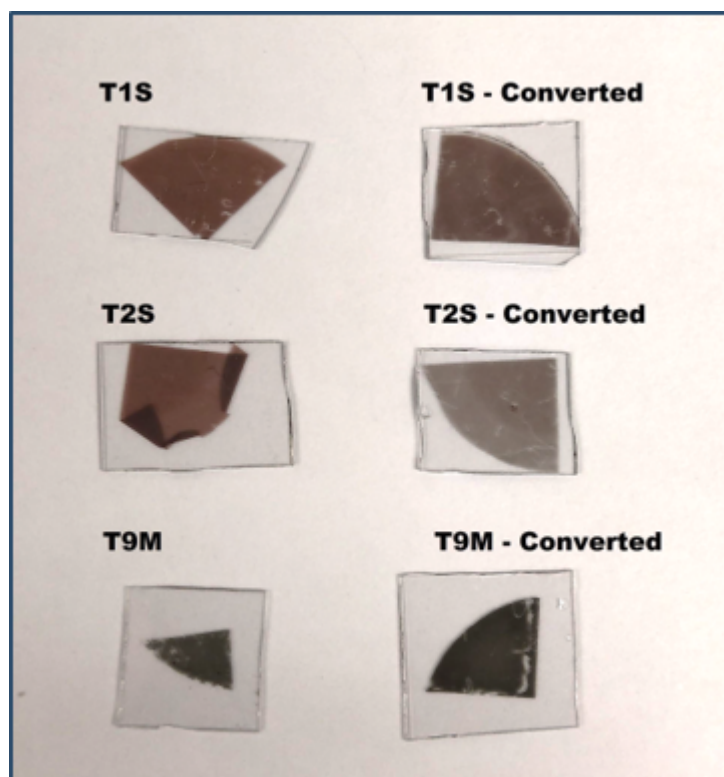

Films before and after conversion

We received:

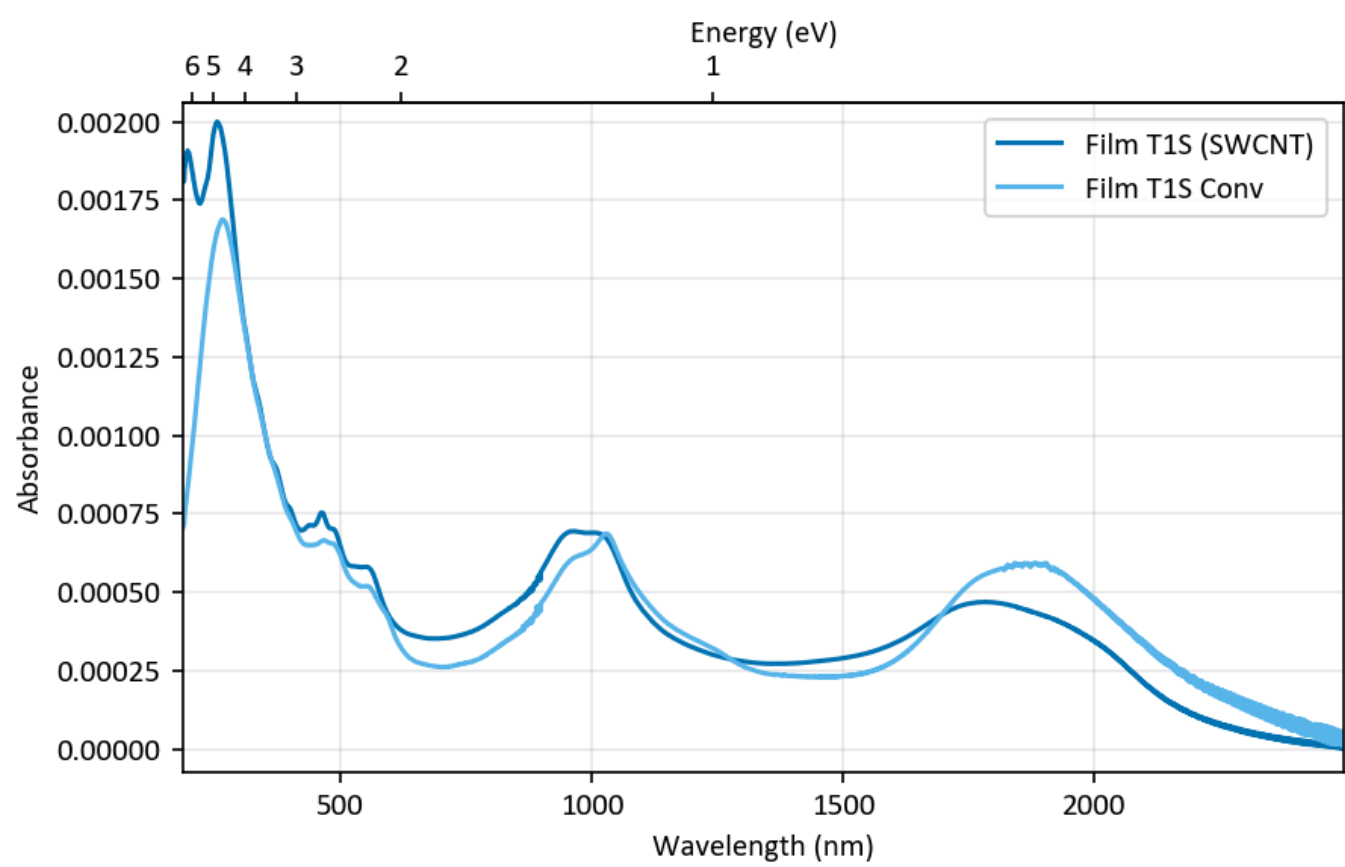

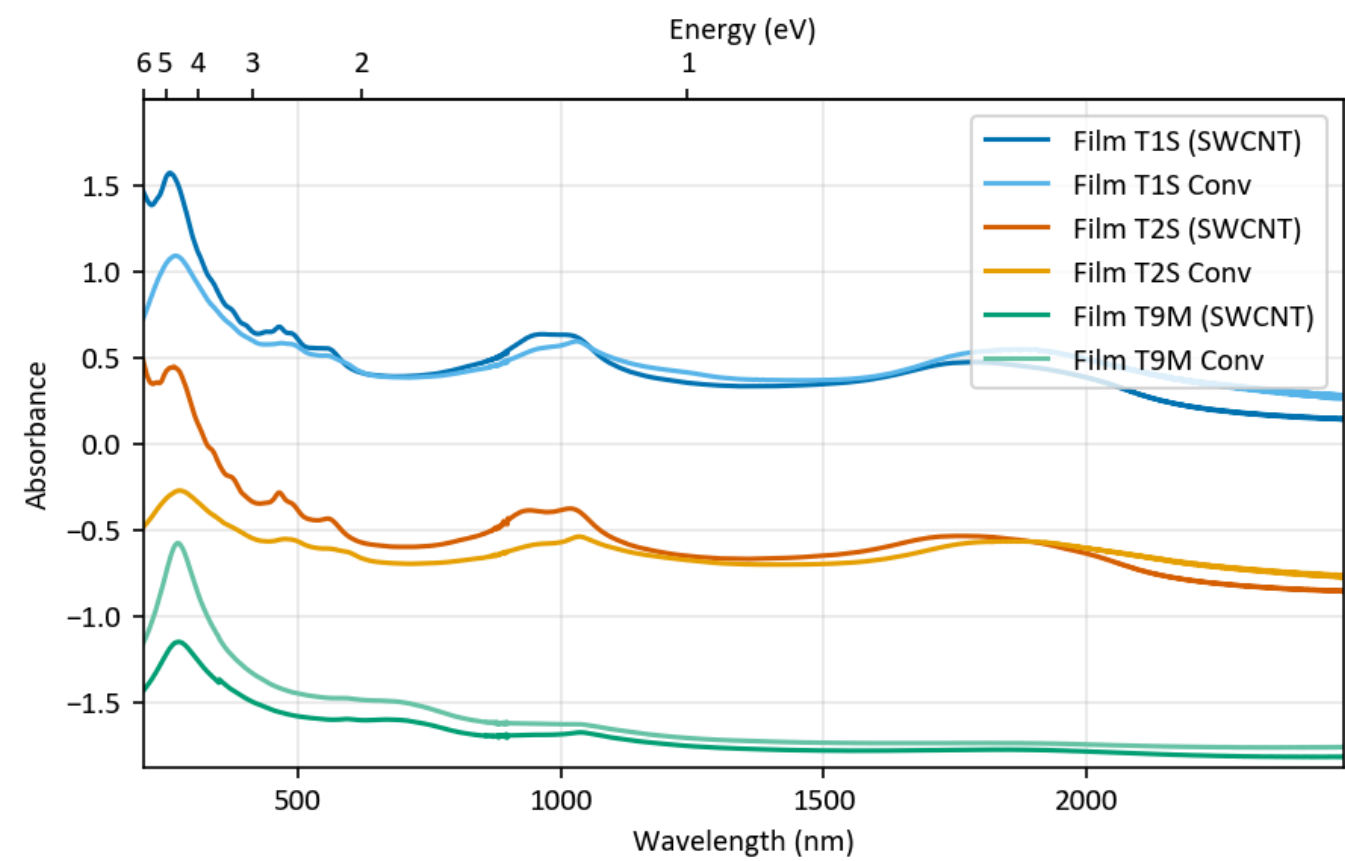

- sT1 film before conversion

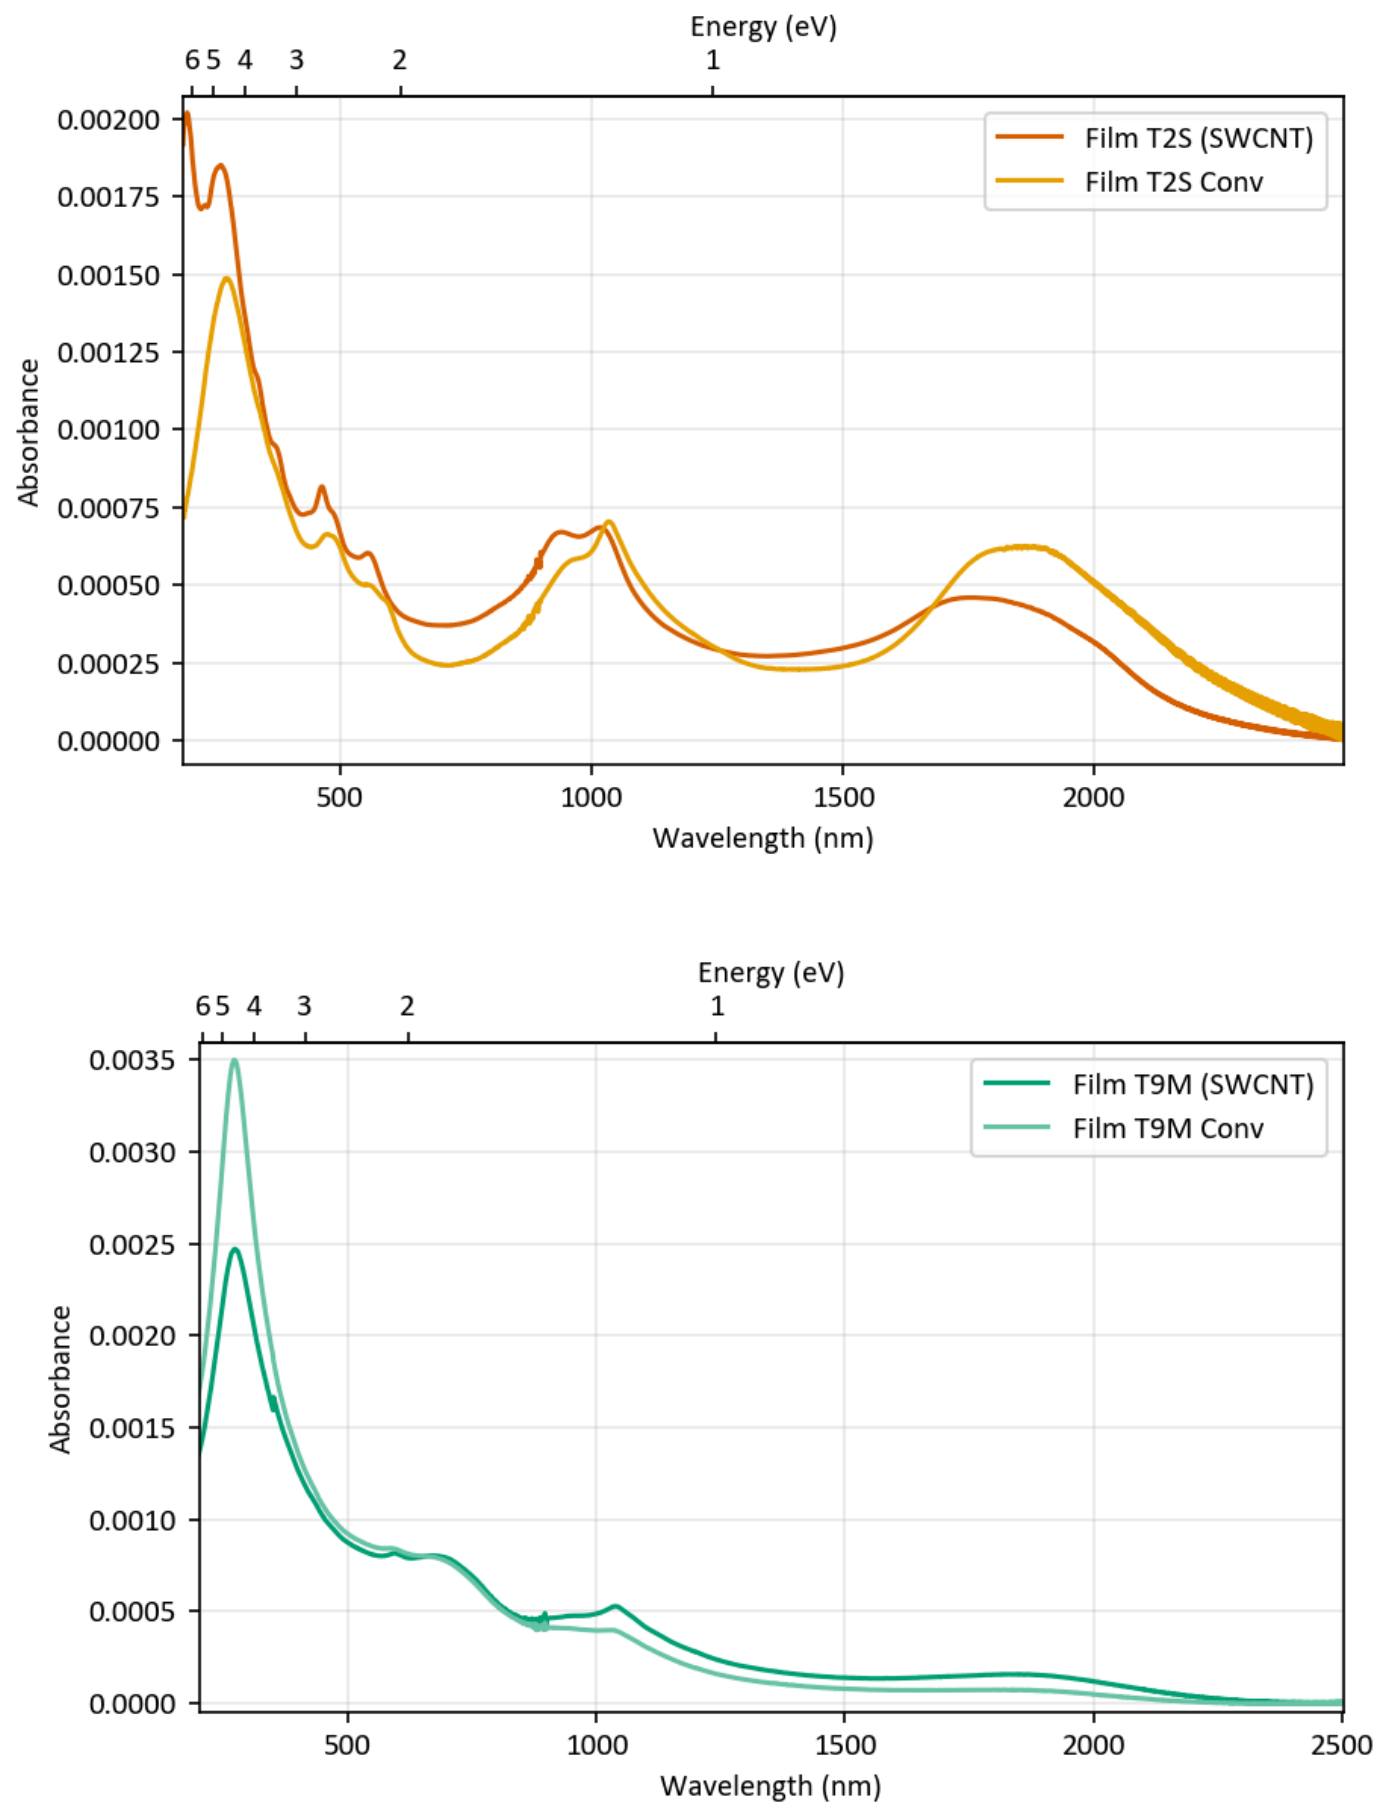

- sT1 converted film
- sT2 film before conversion
- sT2 converted film
- mT9 film before conversion
- mT9 converted film

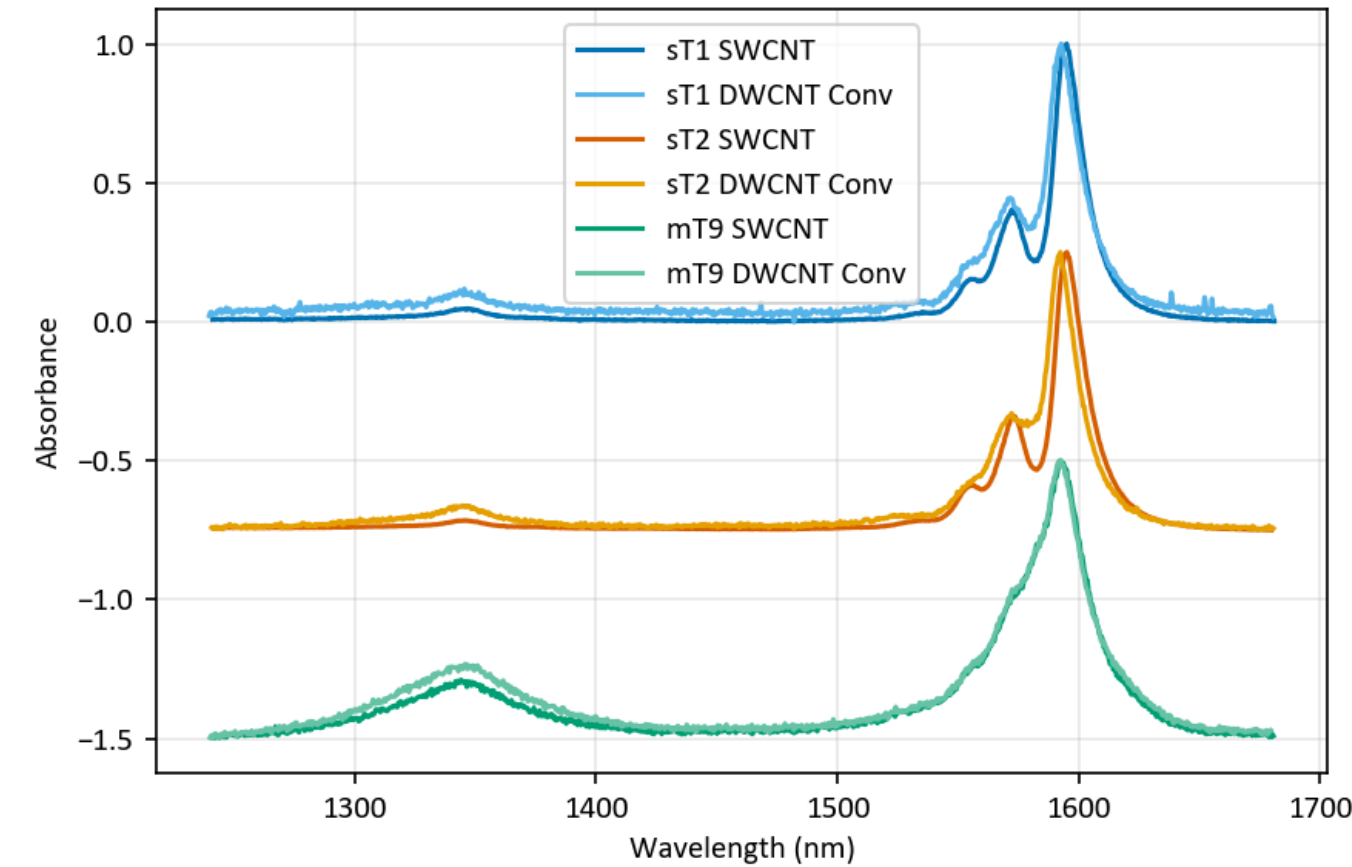

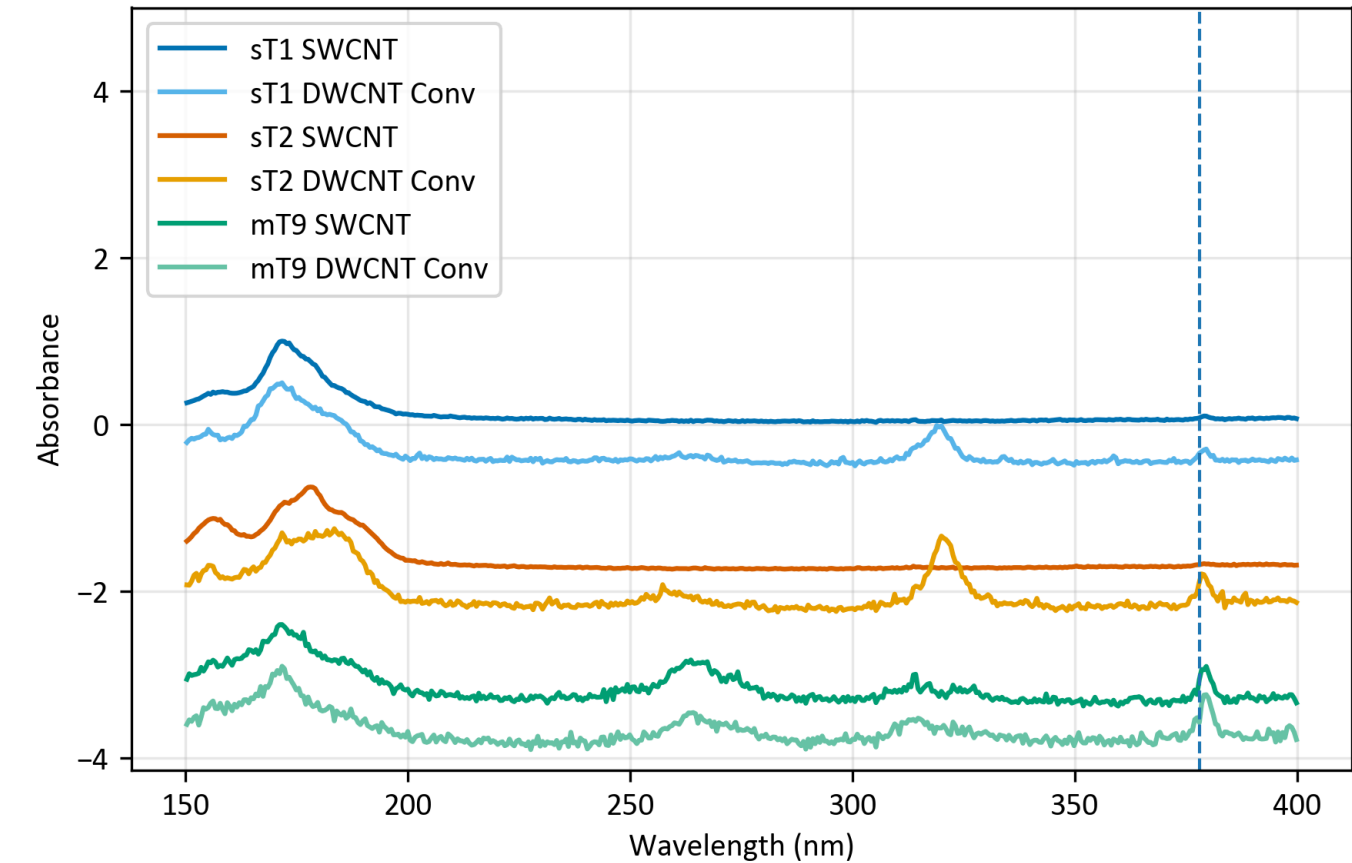

Absorption

More prominent metallic peaks after conversion. Results consistent with figure 2 of the manuscript.

Raman@514nm

Raman@561nm
